What is Summerboard?

Enjoying outdoor board sports like wakeboarding, surfing, snowboarding and more is an incredible escape for millions of riders around the world - but it's outside the reach of everyday life.

Summerboard has created a sport that brings the excitement and mechanics of these board sports home to everyday life.

The powered drift and deep carving is achieved with a unique 360 drive system that replicates the 360 degree nature of the most exciting outdoor board sports.

Let's start by examining how these mechanics are replicated by the Summerboard.

// What is a Summerboard?

Deepest Carves

Carving happens when digging into water or snow with the edge, and leaning the board to cut and turn.

Summerboards Carve

When the Summerboard rider leans, the board tilts and creates a deep carving turn that feels like you're digging into the street.

// What is a Summerboard?

Massive Drifting

The flat bottom of surfboards and snowboards provide the ability to drift (sideways motion) and this is what provides that magical feeling of these board sports.

Summerboards Drift

The 360 drive wheels replicate the smooth underside of a surfboard/snowboard, and this is what provides the same 360 nature of a snowboard. Read on to see how this works.

// What is a Summerboard?

360 Drive Wheels

This is the magic of the Summerboard system - two drive wheels under the center of the board that can rotate in 360 degrees.

Two 360 drive wheels form the base, and four edge wheels form the edge. This gives that magical feeling of drifting and carving that no other board brings to you right at home.

// What is a Summerboard?

Power from Nature

From massive waves to steep mountain slopes, nature provides the power for board sports out in the wild.

Electronic Power

The Summerboard is powered by automotive grade lithium ion batteries and a wireless remote to control your speed. It's like having your own wave or mountain under your control.

// What is a Summerboard?

Total Speed Control

You can shred as slow as you like, and as fast as 25mph on flat terrain, and even up hills.

Roll Forward to Accelerate

Simply roll the thumbwheel forward to accelerate. The further you roll the wheel, the faster you go. Rolling the thumbwheel all the way forward is like dropping into Bonsai Pipeline, while gently rolling it forward is like cruising a bunny hill.

Roll Backward to Brake

You can also use the remote control as an electronic brake by rolling the thumbwheel backwards. This will even regenerate charge back to the battery.

Unlimited Range

The dream of every surfer is the never-ending wave, and every snowboarder the endless mountain slope.

The spirit of the never-ending wave is why we made swappable batteries - because no one wants the fun to end with a dead battery in the middle of an intense shred session!

The Summerboard features swappable batteries to keep the fun going until your legs turn into jelly.

Each spare battery contains up to 12 miles of riding, weighs only 5 lbs, and easily fits into a slim backpack to ride and not even know it's there.

Shred Off-Road

The Freshies Drive Wheels have an internal suspension so you can **turn even the gnarliest path into fresh powder.**

The spherical wheel shape bounces over rocks and cracks with ease, turning poor conditions into fresh pow.

That's why they're called The Freshies!

What's in the box

You get everything you need to shred with the basic package:

1 - Summerboard with battery

2 - Wireless remote control

3 - Remote charging cable

4 - Summerboard standard charger

5 - Quick Start Guide

6 - Summerboard Manual

7 - Battery Care Guide

2-Year Warranty

We stand by our products and our customers with the industry's only 2-year warranty.

We take pride in the quality of our products, and back it up with a 2-year warranty on the most important parts like the electric motors, mounts and trucks.

Our support staff is second to none, with a company-mandated average response time of less than 3 hours to every support ticket.

When you buy a Summerboard, we have your back!

Rider Stories

Summerboard riders hail from more than 85 countries around the world. From age 8 to 75, from 60lbs to 330lbs - Summerboard riders are shredding every day of the year across the globe.

A few of these riders are featured in our Rider Stories, and share their experience with the Summerboard and how they use it in their lives.

Motivating others to be kind, positive, and creative, Vybe loves sharing the feeling he gets when he's in the zone boarding to music.

“The Summerboard brought out a level of confidence in myself that I never knew I had.”

Customer Reviews

“It’s been quick to pick up after just one sesh and incredibly fun” Luke L.

“The board exceeded all my expectations! **Thanks for making every snowboarder's dream come true!!**” – John P.

“Taking my board away is like taking a crack pipe from a crack head!” – Mike B.

“It was a dream come true and I quickly got the hang of it. **riding is all I can think about**” – Bryan F.

“The board arrived, **it is honestly a dream.** I can’t be without it for one second.”
Ruben A.

“I’m totally hooked!” Jason M.
